Project Jupyter Book Website

Unit: KGG375 Geospatial Data Analytics

Content 60%	Excellent	Very Good	Good	Satisfactory	Unsatisfac
Catchy Title	5 points Excellent title that is informative, concise and related to the project topic capturing interest through creativity	3.5 points Good title that is informative, concise and related to the project topic	3 points Good title that is related to the project topic but may be a little long or has a poor choice of words	2.5 points Adequate title that is related to the project topic but lacks creativity and/or is poorly formatted	1.25 point Poor title t lacks any c
Clear and compelling background, justification, and motivation	5 points Clearly expressed motivation in pursuing project and provided a compelling justification of the importance of project with relevant background context	3.5 points Implied motivation in pursuing project and provided a justification of the importance of project with relevant background context	3 points No motivation provided in pursuing project although has provided a justification of the importance of project with relevant background context	2.5 points No motivation provided in pursuing project and/or lacks justification of the importance of project although has provided some limited background context	1.25 point No motiva and lacks j project an text
Explicit project aim and objectives	5 points Clearly expressed project aims and objectives that fit within the scope of the chosen project	3.5 points Clearly expressed project aims and objectives that don't quite fit within the scope of the chosen project	3 points Project aims and objectives are present but they are not clearly expressed or directly related to the project	2.5 points Clearly expressed although missing either aims or objectives	1.25 point Poorly exp
Appropriate choice of GIS analysis techniques for project problem	5 points Excellent and innovative choice of GIS analysis techniques to solve problem	3.5 points Excellent and optimal choice of GIS analysis techniques to solve problem	3 points Good although not optimal choice of GIS analysis techniques to solve problem	2.5 points Adequate choice of GIS analysis techniques to solve problem	1.25 point Poor choic solve prob
Clear explanation of GIS analysis techniques and complete workflow	10 points Well documented with a clear explanation of the steps (using graphics) required to produce analysis	7 points Good documentation with a adequate explanation of the steps (using graphics) required to produce analysis	6 points Adequate documentation with some explanation of the steps required to produce analysis	5 points Minimal documentation and an unclear explanation of the steps required to produce analysis	2.5 points Poorly doc steps requ
Good synthesis and clear presentation (in graphics and text) of key findings	10 points Clearly and succinctly shown key findings of the project and synthesised the findings with the aims and objectives of the project	7 points Clearly shown key findings of the project and how the problem has been solved using spatial analysis	6 points Key findings of project has been stated adequately and how the problem has been solved using spatial analysis	5 points Key findings of project are unclear although has shown how the remote sensing problem has been solved using spatial analysis	2.5 points Poor repre has not sh the proble
Good explanation of the main hurdles and possible alternative approaches	5 points Concise and complete explanation of the main hurdles and possible alternative approaches	3.5 points Good but not exhaustive explanation of the main hurdles and possible alternative approaches	3 points Reasonable explanation of some of the main hurdles and/or possible alternative approaches	2.5 points Adequate although incomplete explanation of some of the main hurdles and possible alternative approaches	1.25 point Poor or mi main hurdl es
Clear summary of the "take home points"	5 points Well communicated and articulated "take home points" that link directly back to main aims and objectives	3.5 points Clear "take home points" that link back to main aims and objectives	3 points Adequate "take home points" that don't link back to main aims and objectives	2.5 points Unclear "take home points" that don't link back to main aims and objectives	1.25 point Unclear co fused abou are
Appropriate level of difficulty and complexity in the GIS analysis	10 points Completed the project with a high level of complexity in GIS analysis showing a synthesis of GIS skills learnt throughout the semester	7 points Completed the project with a good level of complexity in GIS analysis showing all skills learnt throughout the semester	6 points Completed the project to a adequate level of proficiency showing some of the skills learnt throughout the semester	5 points Completed the project with a low level of remote sensing analysis complexity and proficiency	2.5 points Incomplete of proficie

Appearance 20%	Excellent	Very Good	Good	Satisfactory	Unsatisfac
Professional maps and graphics	5 points Excellent maps and graphics with all cartographic components, graph labels, and appropriate graphic resolution, logically organised and in an engaging colour scheme	4 points Complete maps with and graphics with all cartographic components, graph labels, and appropriate graphic resolution, but less than optimal layout and/or poor colour scheme.	3 points Good maps and graphics with all the cartographic components, graph labels, and somewhat appropriate graphic resolution, with an average layout	2.5 points Reasonable maps and graphics with most of the cartographic components, graph labels, and limited graphic resolution. The layout is average.	1 point Poor maps than one c labels, hav are poorly innovation
Inclusion of appropriate visual tools (imagery, graphs, workflows, etc.) to communicate methods and results	5 points Website has excellent visual and innovative tools to complement and build an engaging story that represents the project	4 points Website has a high level of visual tools to complement and build an engaging story that represents the project	3 points Website has a reasonable level of visual tools to complement and build an engaging story that represents the project	2.5 points Website has limited visual tools to complement and build an engaging story that represents the project	1 point Website ha municate t project
Design – aesthetically pleasing, easy to read, appropriate colours & fonts	2 points Website is of a professional quality that is easy to read, has captivating colours, fonts are well sized and appropriate that compliment the project nicely	1.7 points Website is of a high quality that is easy to read, has a good colour scheme, fonts are well sized and appropriate	1.3 points Website is of a reasonable level of quality that is easy to read, has an average colour scheme, fonts are average and are mostly sized appropriately	1 point Website is of an adequate level of quality that is not easy to read, has an average colour scheme, font choice is poor although mostly sized correctly	1 point Website is tion, hard font choic propriately
Logical organisation and layout	5 points Layout of website is exceptional, setup in a naturally logical manner, flowing from beginning to end, allowing the reader to easily follow the content	4 points Layout of website is excellent, setup in a consistently logical manner, allowing the reader to easily follow the content	3 points Layout of website is good, although lacks flow and has some inconsistency which slightly distracts from the content	2.5 points Layout of website is adequate, lacking flow and has many inconsistencies which distracts from the content	1 point Layout of manner, la completely
Clear and logical connection to associated text and data	3 points Exceptional use of text to support data adding a very high level of explanatory power to the website	2.5 points Excellent use of text to support data adding a high level of explanatory power to the website	2 points Good use of text to support data adding some explanatory power to the website	1.5 points Adequate use of text to support data adding a limited explanatory power to the website	1 point Poor use o the explan

Writing/Text 15%	**Excellent**	**Very Good**	**Good**	**Satisfactory**	**Unsatisfac**
Clarity of writing style	5 points Writing style is excellent, using clear and concise language and free from grammatical errors.	3.5 points Writing style is good, using clear and concise language. The writing is generally free from grammatical errors.	3 points Writing style is reasonable, generally using clear, but sometimes diffuse language.	2.5 points Writing style is adequate, using sometimes clear, but generally diffuse language.	2 points Writing is is confusin points.
Documentation	5 points The GitHub repository is professionally structured and includes a clear README that provides an overview of the project, links to the published Jupyter Book, and explains the organisation of the repository.	3.5 points The GitHub repository is well structured and includes a clear README covering the project, published Jupyter Book, and repository organisation, with only minor omissions or inconsistencies.	3 points The GitHub repository is logically organised and includes a useful README covering most key information, although some aspects such as repository organisation may lack detail.	2.5 points The GitHub repository has an adequate structure and includes a basic README, but important information is incomplete, unclear, or difficult to follow.	2 points The GitHu and/or the mation, ma project, its
Appropriate use of scientific references and correct citation style	5 points Appropriate number of scientific sources chosen with correct formatting and citation style	3.5 points Appropriate number of scientific sources chosen with a few errors in formatting and citation style	3 points A moderate number of scientific sources chosen with a few errors in formatting and citation style	2.5 points A moderate number of scientific sources chosen with many errors in formatting and citation style	2 points Too few/o with an inc

Creativity 5%	**Excellent**	**Very Good**	**Good**	**Satisfactory**	**Unsatisfac**
Innovative idea, design or content	2 points Website exceeds the project description and demonstrates innovation at a high level	1.4 points Website shows a moderate level of innovation for all parts of the project	1.2 points Website shows a low level of innovation for some/all parts of the project	1 point Website shows a very low level of innovation for some/all parts of the project	0.8 points Website fa step of the
Engaging and convincing Jupyter Book	3 points The website is scientifically compelling and attractive clearly demonstrating an in-depth engagement with the topic	1.4 points The website shows moderate levels of scientifically compelling content and reflects moderate engagement with the topic	1.2 points The website shows low levels of scientifically compelling content and reflects low engagement with the topic	1 point The website shows very low levels scientifically compelling content and reflects a very low engagement with the topic	0.8 points The websi and reflect
